

Name:

Scoring Rubric for
Image Morph Project.
ICT Class with Ms. Kristen Palana

<u>Element</u>	<u>Worth (in points)</u>	<u>Points Earned</u>
1. One image that is web quality (jpeg, gif, or png file, 72 dpi resolution) is presented in a DRAFT blog post by the due date. The image is visible in the blog post and there is 1-3 paragraphs of text commentary on the image. The student added tags and categories for their blog post.	10	
2. The presenter explains clearly their concept and reasons for their aesthetic and creative choices.	10	
3. Student participates in critique.	10	
4. The image was also saved as a print res. file for Mr. James if he wants to display on the walls or in publications. 300dpi resolution and saved as a tiff, eps, or targa file.	10	
5. Image uses color, lines, texture, etc to create mood, communicate visually, and bring across the concept.	10	
6. Image has good/interesting composition and appropriate placement of elements.	15	
7. The image quality is professional. The levels have been adjusted, there's no unintended warping or pixilation. Edges are clean and deliberate.	15	
8. The image is convincing in its portrayal of a new image reality.	20	
	<u>TOTAL POINTS EARNED:</u>
